

The ADAM RUPPEL ASBACH GMBH was founded in 1946 and is a measuring tools factory. This middle-size private company is a reliable partner in precision parts manufacturing for the industry.

From the solution identification of your individual requests to the construction of prototypes and mass production, we offer you a comprehensive technical know-how.

Turning – Milling – Sharpening – Cylindrical & surface grinding – Thread grinding –
Centreless grinding – Honing – Lapping – Broaching – Shot blasting – Laser marking –
Measuring devices – Assembly – Test laboratory controlled to international standards –
Construction and consultation

Precision – our commitment

The actual state of technique, new production technologies combined with decades of experience is our secrets to help you and make us an ideal partner to solve your most difficult requirements.

We are able to work with each kind of material: from steel, NE-materials, plastic up to titanium alloys.

Our quality assurance system (according to DIN EN ISO 9001 – 2000) is regularly audited by the TÜV Rheinland which guarantees a complete control of all our operational sequences, from quotation to dispatch of order. On request detailed calibration certificates can be supplied for every articles produced.

We are also your competent partner for Kanban, Kaizen and e-business, from the realisation of your ideas up to production. Use our experience as innovative supplier.

Our production range:

- Turning of precision rotation parts (also individual manufacture) to quality class up to $\pm 5\mu$
- Chasing tools – thread grinding
- Thread chasing & grinding between the centres up to $\pm 0.5\mu$
- External cylindrical surface grinding pointless
- Internal cylindrical grinding and flat grinding up to $\pm 0.5\mu$
- External round-lap – honing – thread rolling, knurling tools
- CNC Milling, boring, chamfering etc.
- Electrolyte - construction and development
